

CCW Pro Automatic Water Softeners
CCW Pro Series Metered On-Demand Water Softeners
Environment Friendly

The CCW Pro Metered On-Demand Water Softeners are the most durable long lasting water softeners on the market.

They are metered on-demand with a mechanical display so no electronic board to ever go bad and programming won't be lost during a power outage.

HOW IT WORKS: The CCW Pro counts down your soft water usage and when it gets close to running out of soft water it automatically backwashes that night at 2a.m. (set time of your choice).

Each unit comes standard with a ¾ or 1" stainless steel bypass, fiberglass mineral tank, 14x35 brine tank (salt tank) w/safety float, 8% cross linked resin and a metered fully automatic control valve.
